

# Investment Casting

Traditionally, designing medical device prototypes would require a mold to be produced to create wax masters for the investment casting process. Using FDM® (Fused Deposition Modeling) technology, medical device companies can skip this step, saving time and money.

System	Fortus 400mc
Material	ABS-M30
Build time	02:44
Material used	0.69 in <sup>3</sup> (1.75 cm <sup>3</sup> )
