

MRI Housing

This housing was built for an MRI (Magnetic Resonance Imaging) device used to create images of small, localized area of soft body tissue of lab animals. **MR Instruments, Minneapolis** built this custom MRI surface coil housing for a university lab for scanning the brains of monkeys. The unit gets secured to a monkey's head with Velcro straps.

System	Fortus 400mc, Fortus 450mc
Material	Polycarbonate
Build time	5 days

ISO 9001:2008 Certified
