

Dome Filter

Somos® WeatherX 100 is a great option for applications requiring improved UV and water resistance. Its low viscosity allows for easy cleaning and production of small features. The dome filter shown here can be used as a filter cover in a swimming pool to prevent larger debris such as leaves from entering the filter.

System	Origin® One P3™ DLP
Material	Somos® WeatherX™ 100 NEW
Build Time	4 hrs, 25 mins
