

Drone Chassis

Featuring RG3101 L black material printed on the Origin® One, this is an example of a drone chassis. This part takes advantage of RG3101 L's high strength and long-term toughness attributes. This is a tough material, which features 32% elongation at break and 80D hardness. This solution is perfect for operations making high-finish parts that require high strength, long-term toughness. RG3101 L is a great end-use solution or a stop gap material to help keep production workflows on track.

System

Origin® One P3™ DLP

Material

Somos® WeatherX 100
