

# Perfume Bottle

Luxury good products such as perfume bottles often come in unique and appealing designs. Developing and testing these products implies several iterations to determine the final design. Perfume bottles and similar types of containers require low water absorption, translucent color or finish, and high toughness. LOCTITE® 3D IND405 provides all of these material and part characteristics enabling customers to quickly and cost effectively accelerate product design and testing.

System	Origin® One P3™ DLP
Material	LOCTITE® IND405 Clear
Build Time	7 hrs, 37 mins
Material Used	51.45 cm <sup>3</sup>
