

TH212 - Cover with Nema & Zhaga Interface by Techno srl

The cover, compliant with NEMA and ZHAGA standards, allows meeting requirements for integrating TH212 box with interfaces for electrical or LED luminaries. Leveraging the Internet of Things (IoT) advantages of TH212, combined with components manufactured to Zhaga standards for the lighting industry or NEMA standards for the electrical and building industry, opens the scope of possibilities for applications ranging from smart cities to IIoT-enabled applications. The component is designed to withstand outdoor installation, UV exposure, and atmospheric agents. Utilizing the resin LOCTITE® 3D 3843 allows achieving an IP66 protection grade and IK8 impact resistance, all while maintaining a smooth and aesthetically pleasing design finish.

System

Origin® One P3™ DLP

Material

LOCTITE® 3D 3843
