

Packaging Prototype

The Neo can produce intricate parts with smooth side wall quality and detail, great for complex designs.

Parts printed in Somos® 9120™ material are semi-flexible and exhibit superior fatigue properties, strong memory retention and a good balance of properties between rigidity and functionality which is perfect for packaging applications.

System	Neo® 450 Stereolithography
Material	Somos® 9120™
Build Time	4 hrs, 30 mins
