

# Aerospace Optics Bracket

Featuring ST45 material printed on the Origin One, this optics bracket makes use of the tough material, which features 21% elongation at break and 80D hardness. This solution is perfect for operations making high-finish parts that require high strength and long-term toughness. ST45 is a great end-use solution or a stop gap part to help keep production workflows on track.

<b>System</b>	Stratasys Origin® One P3™ DLP
<b>Material</b>	Ultracur3D® ST45 by BASF
<b>Build Time</b>	12 hrs
