

Headlamp Cap

Encompassing the entire head lamp or a sub-system component, enclosures are exposed to residual heat generated by the lamp and electrical assembly. They need to have sufficiently high temperature resistance to prevent significant part deformation but maintain a requisite level of toughness. Additionally, detailed features and high surface finish can be attained for quality and part identification purposes.

System	Stratasys Origin® One P3™ DLP
Material	P3™ Deflect™ 120
Build Time	4 hrs, 57 mins
Material Used	33.86 in ³ (86 cm ³)
