

Material Guide Tube Housing

This part houses and positions the filament guide tubes on the F900® 3D printer. It was printed on an F900® using ASA material and highlights the ability of the F3300™ printer to make low-quantity production parts. This application is beneficial for avoiding the high cost and long lead time of injection molding. Depending on the total quantity, 3D printing can be less costly than the up-front investment in mold tooling while providing on-demand production flexibility.

System	F900®
Material	ASA
Build Time	2 hrs, 28 mins
Material Used	5.49 in ³ (13.9 cm ³)
Support Material Used	0.52 in ³ (1.3 cm ³)
