

Air Duct Adapter

Components used in air ducts and HVAC systems need to resist moderate temperatures and humidity levels. Adapters like the one shown here also need to demonstrate toughness to work with air when connecting air ducts with smaller offshoots or rooms. Printed on the Origin One platform, Loctite 3843 black material was used to take advantage of its combination of rigidity and toughness making this a dependable and robust part and easy to install.

System	Stratasys Origin® One P3™ DLP
Material	LOCTITE®3842 Black
Build Time	19 hrs
Material Used	268.1 in ³ (681 cm ³)
