

Customizable Supports for TH212 Box

by Techno srl

TH212 featuring a series of internal supports, innovatively designed to simplify user interaction and optimize integration of various components within the box for (Industrial) Internet of Things applications. The compliant mechanism incorporated into the design enables the attachment of different components using a single support base, paving the way for modular integration. By printing Loctite® 3D 3172 on Origin® One, compatibility with mechanical requirements is assured, achieving modularity through the compliant mechanism design.

System	Stratasys Origin® One P3™ DLP
Material	Loctite® 3D 3172
