

TH400UP Connector

by Techno srl

The TH400UP Connector is a groundbreaking solution designed for seamless integration with the Wago 221 potential, offering clients flexibility in customizing the number of poles for their electrical applications. Engineered to withstand thermal and current stress while ensuring robust protection from environmental factors, this connector surpasses conventional standards. Utilizing Loctite® 3D 3843 on Origin® One guarantees unparalleled dielectric, high voltage, and high current resistance in challenging work environments, delivering a ready-to-use product for flawless connection experiences. The clear version, Loctite® 3D IND 405 elevates inspection processes by providing a transparent view of connection and component status, achieving an impressive IP68 protection grade and IK8 impact resistance, all encapsulated in a sleek and aesthetically pleasing design printed accurately on Origin® One.

System

Stratasys Origin® One P3™ DLP
