

Automotive Grill

Utilising the 800x800x600 mm platform size, the large prototype was printed in one build without needing to section or bond parts together.

Parts printed on the Neo800 produce industry leading sidewall quality and accuracy, significantly reducing post production and finishing times. This part is printed in Somos WaterShed Black which reduces the need to paint the part. The quality of the Somos material and the Neo hardware produces parts that look close to injection molded.

System	Neo®800 stereolithography
Material	Somos® Watershed® Black
Build Time	2 days, 1 hr, 10 mins
Material Used	4.6kg
